Subject index of volume 121

Adaptation
  high altitude, 257
Afferents
  chemo, 135
Artery
  pulmonary, tension, CO_2, 65
Blood pressure
  systemic hypertension, hypoxia, 173
Brainstem
  raphé, pontine respiratory group, ventral respiratory group, Ncl. tractus solitariii, 119
  sympathetic nervous system, 173
Carbon dioxide
  bicarbonate equilibration, carbonic anhydrase, 1
  gill transfer, 53
  isocapnic hypercapnia, pulmonary artery tension, 65
Carbonic anhydrase
  distribution, 1
  fish gill, 53
Carotid body
  chronic hypoxia, 237
  development, 199
  ET-1, CNS activity, catecholamine release, 13
Chemoreceptors
  carotid body, 119
Chemosensitivity
  hypoxic, plasticity, 199
Control of breathing
  brainstem neuron integration, 119
  carotid body, endothelin, 13
  central hypoxia, 101
  hypoxia, 87, 185
  hypoxia, long-term facilitation, 135
  hypoxia, hypercapnia, maturation, 199
  hypoxic response, 163
  hypoxic ventilatory acclimatization, carotid body, 237
  hypoxic ventilatory response, 223
  peripheral afferents, nTS, 209
Development
  hypoxic ventilatory response, 185
  ventilatory response to hypoxia, hypercapnia, 199
Diffusion
  limitation, fish gill, 53
Disease
  pulmonary edema, exercise, 25
Endothelium
  pulmonary artery, 65
Enzymes
  carbonic anhydrase, 1
Exercise
  strenuous swimming, 25
  ventilatory response, 5-HT, 45
Fish
  rainbow trout (*Oncorhynchus mykiss*), 53
Function test
  lung, strenuous exercise, 25
Gas exchange
  gill CO_2 excretion, 53
Genes
  ventilatory behavior, 247
High altitude
  ventilatory acclimatization, 257
Hypertension
  systemic, chronic-intermittent hypoxia, sleep apnea, 173
Hypoxia
  chronic-intermittent, hypertension, 173
  dynamic ventilatory response, 87
  long-term facilitation, 119, 135
  medulla oblongata, phrenic, sympathetic activities, 101
  signal pathway, 209
  sustained, intermittent, sympathetic response, 163
  sympathetic stimulation, 147
  ventilatory acclimatization, 223
  ventilatory response, 257
  ventilatory response, development, 185
Mammals
  cat, 119
  goat, 45, 223
  humans, 25, 33, 135, 163, 223, 257
  mouse, 247
  piglet, 185
  rabbit, 13
  rat, 75, 87, 135, 223, 247
  swine, 185
Mechanics of breathing
  swimming, 25
  wind instruments, 33
Mediators
  acetylcholine, 75

PII: S0034-5687(00)00167-5

adenosine, 185, 199
catecholamines, 13
dopamine, 199
endothelin, 13
glutamate, 209
NO, 65
opioids, 185
platelet-derived growth factor β, 209
serotonin, 45, 135
Substance P, 185
Medulla oblongata
hypoxia detecting neurons, 101
ventrolateral, hypoxia, presympathetic system, 147
Modulators
dopamine, 237
endothelin, 237
NO, 237
norepinephrine, 237
substance P, 237
Muscle
bronchial smooth, GTP-binding proteins, 75
Nucleus
tractus solitarii, receptors, 209
Pattern of breathing
central hypoxia, gasping, 101
genetic determination, 247
Pharmacological agents
fenfluramine, 45
fluoxetine, 45
Plasticity
long-term facilitation, 135
Pressure
mouth, flute playing, 33
Pulmonary circulation
vasoconstriction, isohydric hypercapnia, 65
Reaction
CO_2 -HCO_3^- , 53
Receptors
muscarinic, bronchial smooth muscle, 75
NMDA, PDGFβ, 209
Respiratory frequency
short-term depression, post-hypoxic frequency decline, 87
Respiratory muscles
flute playing, 33
Sleep
apnea, hypertension, 173
obstructive apnea, 147
Sound
pitch, loudness, 33
Sympathetic nervous system
activity, hypoxic response, 163
hypoxia, 147, 173
Upper airways
dead space, exercise, 45
hyperresponsiveness, 75
Ventrolateral pons
hypoxic response, 87
